Building and developing a digital transformation strategy

Oct2023-present

We worked on assessing the current situation, analyzing the gaps, developing a roadmap, and training employees. We held workshops and I worked on weekly reports on the project status, presenting the outputs to the digital transformation committee for approval and working on digital transformation initiatives.

Risk management and business continuity

We held workshops to analyze the gaps for 35 departments to analyze risks for all departments, and conducted introductory workshops for employees and department heads. We prepared reports and meeting minutes, and held weekly meetings with the company to discuss the project's progress.

Data classification

And Working with the Digital Government Authority on measuring digital transformation requirements to achieve digital transformation requirements through application. Reviewing and collecting all available and incomplete documents, reviewing all measurement indicators to increase the percentage, establishing an internal team, and implementing a system for monitoring benchmarks.
