Abduljaleel Al Jasem

Senior MET at hadeed sabic
Jubail Industrial City, Eastern, Saudi Arabia

Summary

As an ambitious professional with innovation proficiency and extensive Lead Machinist experience, I was thrilled to learn about the Workshop Supervisor opening. I believe that my professional background and industrialist drive make me an ideal candidate, thrive in high-pressure and fast-paced situations, striving for positive results by applying my mechanical and safety procedure adherence abilities. Further, I possess expertise in safety compliance and acumen for maximizing performance and inspiring colleagues. I am able to visualize success and identify unconventional yet highly effective strategies for achieving it.

Experience

Saudi Iron & Steel Com (HADEED)
Senior Machinist
August 2009 - Present (13 years 8 months)
Eastern, Saudi Arabia

- Planned machining by studying work orders, batch record, materials, specifications, reference, locations of surfaces, and machining parameters.
- Provided job training and monitored performance of team members.
- Studied blueprints or layouts on workpieces to determine sequence of operations and finished dimensions of workpieces.
- Closely monitored equipment to detect and report malfunctions and prevent accidents.
- Implemented updated operating procedures for Lathe ,Milling , Drilling , grinding ,Boring machines and adjusted use to increase productivity and longevity.
- Safely operated heavy machinery such as pumps, fans and gear reducers without incident.
- Studied daily work instruction, sketches, drawings, blueprints and manuals to determine dimensions and tolerances accurately.
- Saved over 1 million by implementing an idea to reuse of damaged Electrode

- Developed team communications and information for Monthly Safety meetings.
- Used CNC and manual equipment to perform both initial and final machining.
- Operated heavy duty lathes, boring machines, mills, planers and grinders to craft products.
- Kept manufacturing and machining work areas clean and neat.
- Interpreted drawings and planed work in proper operational sequence

Gulf Ferro Alloys Company (SABAYEK)

Mechanical Technician

March 2008 - July 2009 (1 year 5 months)

Al Jubail Industrial, Eastern, Saudi Arabia

Frequently diagnosed mechanical problems and determined how to correct issues.

Inspected and tested equipment, machinery and components to diagnose issues, recognize defects and determine appropriate repairs.

Implemented preventive maintenance measures to decrease emergent issues.

Identified mechanical problems and determined best solutions for correction.

Performed troubleshooting, diagnosis and repair of conveyor belt equipment.

Education

Jubail industrial College

Associate's degree, Manufacturing Engineering Technology · (2002 - 2006)
