OBJECTIVE

Seeking a challenging and interesting career position with potentiality for advancement. Willing to handle responsibilities of all kinds of business including supervision and team working. Find a job which increases my abilities and improves my skills. Develop a company's work. Work with Arab and foreign people.

EXPERIENCE

January/2011

- Present

Baker Hughes Company-Dhahran-KSA

Field Specialist II & Mud Tester

Field Specialist II Description:

This is experienced level of technical work performed in the preparation, processing and treatment of rock samples for further analytical purposes. Work involves the operation of a variety of laboratory equipment in the preparation of thin to ultra-thin to polished thin sections from core, outcrop and drill cutting samples (for both siliciclastic and carbonates).

Mud Tester Description:

Check the mud before and after treatment with chemical. Making a daily report. Using GGT Sulfides Test which should be run a minimum of 3 times per day while drilling and on the filtrate every 2 hours while soluble sulphides are present. Check the amount of H₂s and Co₂ in solution during Drilling.

September/2013

-

December/2013

Baker Hughes Company-Dhahran-KSA

Coil Tubing Engineer Trainee

Coil Tubing Engineer Trainee Description:

Prepare for assembles equipment for installation and service in well sites and fields. Monitor well control parameters and calculations before and during job applications. Include understanding the well map, calculating the string weight and determine maximum tension, to ensure maintenance and continuity of safe and timely CT operations within given parameters.

October/2009

-

December/2010

Geoservices Company-A Schlumberger Company-Dhahran-KSA

Mud Logger

Mud Logger Description:

Mud Logger collects and monitors geological samples and data from sensors in 'real-time' from computer based data acquisition system during operations at an onshore or offshore oil rig. The Mud Logger interprets the information with regards to pit levels, rate of penetration, the rotation speed, the mud fluid flow rate, cutting and pump rate. Inside the unit He will work alongside the Data Engineer.

January/2007

-

September/2009

Basic Chemical Industries Company Limited-Dammam-KSA

Chemical Process Operator

Chemical Process Operator Description:

Chemical Operators assist other members of the production team by cleaning, preparing, repairing, and monitoring the heavy machines used to mix and process chemicals. They mix and handle chemicals, record information and observations relating to the mixing process, troubleshoot issues with equipment.

July/2009 -
September/2009

Qabas Omni Petroleum Service Company-Dammam-KSA

Summer Training Student-Core Analysis Technician

Core Analysis Technician Description:

Take a knowledge of two kinds of core analysis which are Basic (routine) Core Analysis and Special Core Analysis.

Basic (routine) core analysis involves the measurement of the most fundamental rock properties under atmospheric conditions. Porosity, permeability, saturation, and gross lithology all provide critical information in deciding whether a wellbore will be economic.

Special core analysis involves tests that are supplementary to the basic core analysis program. Special core analysis includes laboratory measurements used in reservoir engineering, petro-physical evaluation, and drilling-and completion-engineering evaluation.

March/2006
-
November/2006

AlQahtani Pipe Coating Terminal-Dammam-KSA

Quality Control Inspector

Quality Control Inspector Description:

Preparing inspection & test reports of completed inspections & tests. Ensuring all equipment's, tools and materials meet with the project quality requirements and that personnel have been adequately trained to use them safely. Compile and Submit weekly report and requested information / statistics to Department QC Supervisor
