2016 - 2021
Bachelor GPA: 2.88
Major in Engineering Management
Morehead State University
Kentucky

Final Year Project

Title

Assessments of risk involved in high-rise building & construction mitigation measures

Construction complexity is increasing by the days with urge by developers to go higher and increase building space. My project focuses on the complexities in high rise buildings, assessing the risks and applying the mitigation measures to prevent from the happenings. Some steps are being proposed to assess the risks and develop a risk mitigation system.
