

Faisal Mansour Alshelli

Senior inspector quality Control

Qualified Senior inspector quality Control with distinctive years of experience in developing innovative solutions to complex mechanical issues, carrying out thorough checks the components, finding and correcting errors and faults as well as leading and directing the team. Skilled in examining the quality of products and maintaining safety standards. Currently, I am seeking a managerial position where I can utilize my experience in engine quality management and maintenance to advance the organizational mission and objectives, and developing plans that support organizational strategy in the manufacturing environment.
