Objective:

As a recent graduate with a Diploma degree in Database & Programming 2023 and hands-on experience in various programming languages including Java, Python, and JavaScript as well as experience with developing deep learning projects. I am excited to work alongside a team of experienced developers and contribute to the success of the organization. I am highly motivated to learn new technologies and programming techniques, and committed to delivering innovative and efficient software products.

Coop Training :

The cooperative training period was at King Abdelaziz City for Science and Technology (Kacst) at the Institute of Artificial Intelligence and Robotics, an experience that added to me a valuable experience in the field of artificial intelligence and robotics, and I worked on a project (satellite image analysis) its most important uses (TensorFlow and Python) .

Experience :

- Experience in the Internet of Things (I Made game and device by Arduino)
- Experience in deep learning (satellite image analysis)

Skills:

- Languages : Python , Java , HTML, CSS, JAVASCRIPT , SQL
- Software Testing.
- Experience in most Microsoft office365 applications.
- Projects management software.
- Organization and Time Management
- Planning and Coordination
- Data Entry
- Excellent Communication
- Problem-Solving
- Active Listening
- Finishing work

Education:

- Collage: Applied Studies & Community Service
- Major: Diploma in Programming and Databases , GPA of 4.64

Coursers :

- Cyber Security with drop in 27/08/2020
- internet of things Arduino with code of girl in KPMG from 28/8 to 1/9 2022
- I made device and i got honored by it at the level of Riyadh City
