About Me

I'm fresh graduate in Mechanical Maintenance Technology with a passion for mechanics. Repair and Care of Equipment and Appliances Keen to delve into system maintenance and optimization, I look forward to utilizing my skills and knowledge to create, maintain and repair mechanical components and equipment involved in the mechanical field.

Education

Associate degree in Mechanical Maintenance Technology

- Yanbu Industrial College
- Graduation Year 2022

Experience

Mechanical Maintenance Technician, The cooperative training was at RCMC, Yanbu .

- June 2022 – September 2022

It was a cooperative training at the Royal Commission Hospital in Yanbu. I learned how to perform preventive maintenance and corrective maintenance of pumps and compressors, also working with a team on a regular basis, and how to get work done on time. I also learned how to change consumables parts, such as filters, oil and valves. I also learned how to determine when to lubricate the machines on time. With that I learned how to deal with how to repair the hot steam tubes coming from the boiler, and last but not least I learned how to be responsible for the work.

Skills

- Good Communication.
- AutoCAD-(Beginner).
- Solve mechanical problems.
- Work under pressure.
- Teamwork.
- Time management.

Language

- English - Intermediate
- Arabic - Native
