Career Objective

Electrical and electronics technician , with nearly a year and a half of experience working in different departments, I have made many achievements related to safety for both workers and the work site , and I am seeking a job opportunity that will help me apply my skills and practical experience gained through my work in various positions.

Experiences

Arabian Services Co. Ltd. (ASCC)

Electrician 04 /2021 - Now

- Work in the Electricity Department to ensure the operation of electrical generators, periodically check them and perform the necessary maintenance in the company.
- Working to ensure the safety and functioning of many electrical devices such as (ATS, EMDP, MDP) in addition to making sure that the electrical equipment is connected to the ground current.
- Worked in the department of receiving complaints, raising and verifying them, and then closing them when they were resolved.
- Worked in the Operation and Control Department on an electronic detection device to determine the problems that occur inside The site.
- Worked on the fire system, where I shut down the system if the alarm was activated, and then ensured the safety of the site.
- Worked on water cooling units in terms of operation and shutdown when there is a defect.

Arab Company for Pipes and Services Ltd. (ANABEEB)

Electrical technician –Machinery Maintenance 11/2020 - 04/2021

- Worked in Electrical connections and wiring installations and ensured the effectiveness of electrical and electronic devices.
- operated and maintained electrical generators and their accessories and ensured their safety.
- worked in cooperation with SABIC as a fire inspector, where I ensured the progress of work to achieve the safety of the site.
- Worked in cooperation with Ibn Sina Company as a safety supervisor for workers during their work on the site.
