Objective

I am seeking opportunities to join a company that can help me in enhancing my skills, strengthening my knowledge and realizing my potential. I am willing to explore a wide variety of opportunities that can help me gain perspective."

Team Leader

Obeikan Rigid Plastic

Riyadh | KSA Obeikan is the region's leading manufacturer of value-added rigid plastic packaging products and services, meeting the most sophisticated customer such as Unilever, Kraft, Nestle and Procter & Gamble and leading regional enterprises like Alsafi and Almarai.

Responsible for the operation of a section within the Manufacturing function, supporting the Manager with the day-to-day management of their manufacturing area, overseeing a group of members and ensuring an efficient operation in achieving business targets. Provide leadership and line management to the team, coordinating their workloads, providing support to ensure that the team delivers, monitoring any issues, and ensuring production targets, Key Performance Indicators (KPIs), and quality standards are met in order to meet the requirements of the customer. Develop the team by focusing on individual performance and support requirements to achieve high standards, whilst fostering a culture of working safely. Work under general supervision, reviewed by Management. Decisions and results have an impact on the function and their success. Performance affects the function's image

- Work to ensure people and resources are applied in an efficient and effective manner to meet delivery requirements while achieving quality and safety standards
- Ensure that team members follow defined manufacturing procedures and comply with quality requirements
- Ensure full adherence to 5S(Sort, Set In Order, Shine, Standardize, Sustain)practices at all times
- Ensure equipment is within calibration date and all systems are functioning correctly
- Ensure all records are completed appropriately
- Ensure that the escalation procedure for quality concerns is followed
- Ensure achievement of production throughput against stated capacity targets.
- Ensure the team are aware of day to day targets and responsibilities
- Manage work order closures and stock control transactions
- Monitor change over and/or line set up efficiency
