# Z / A

My name is Zainab, I hope to work at your company because I believe this place is bringing together talented and experienced people that in return would sharpen my skills, that I can bet on them to the extent that I'm ready to work 12 hrs a day for 7 days a week. I have big goals as I set plans to achieve them, and I believe that I leave my mark and make a difference wherever I go. What makes me unique is job mastering and quality of work that I can provide perfectly, so to say, I considered these as my added value comparing to other candidates, If you ask me to do something I would do it better than expected.
